Move **cold leads** into reactivation every **Friday**, and notify the **account owner** ⬆

✦ AI Copilot
✅ Done. This is scheduled for every Friday with owners notified on slack.

Before

After

Natural language is the new mode of interaction with software. Users now expect software to be intuitive, adaptive, and capable of understanding their needs. Traditional applications, with their complex workflows and rigid interfaces, are struggling to keep up. This gap is not just a usability issue; it's a business-critical challenge.

THE INEVITABLE SHIFT

The rise of AI agents isn't a trend; it's a fundamental shift in how users will interact with software. Companies that recognize and embrace this shift will be the ones that thrive in the coming years.
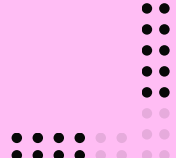

The Agentic Imperative

Don't Just Adapt, Lead

Adopt AI empowers you to go beyond simply adapting to this change. We provide the tools and platform to lead the way, shaping the future of user interaction and setting a new standard for application design.

The Power of the Agentic Experience

Imagine a world where applications anticipate user needs, automate complex tasks, and provide seamless, personalized experiences. This is the power of the agentic experience, and it's within your reach.

What Makes Adopt AI Different?

To thrive in the agentic era, you need a platform that's both powerful and easy to use. Here's how Adopt AI stands apart:

Deep Integration, Maximum Impact

Seamlessly connect Adopt to your existing application, data and tools to build a deep agentic experience for your application.

Speed & Simplicity

Our no code platform empowers your team to build an agentic experience for your application instantly, reducing your development cost and time.

Action-Oriented Agents

Get jobs done for your end users using natural language, without them having to learn your application or adjust to your rigid workflows.

Personalized Experiences

Provide dynamic interfaces customized to what your users are looking for and adjusting to their behavior and preferences, delivering instant value and driving long term loyalty.

Key Transformation Drivers

Empower Your Users

Deliver intuitive, frictionless experiences that increase user satisfaction and drive deeper engagement.

Enable users to achieve their goals faster and more efficiently.

Build stronger user relationships and foster long-term loyalty.

Transform Your Business

Drive significant growth in software adoption and user retention

Reduce support and development costs through AI-powered automation.

Achieve greater ROI and unlock new revenue streams.
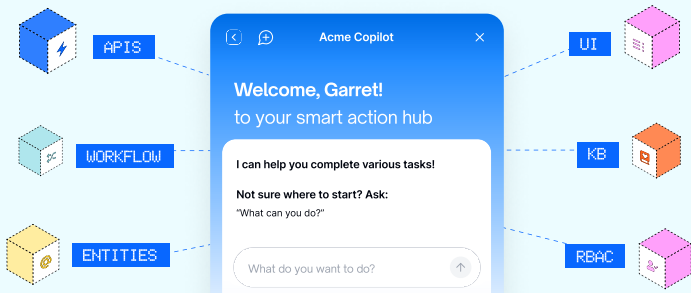

The Adopt AI `ADVANTAGE`

What sets Adopt AI apart is our ability to create a comprehensive agentic experience for the application instantly. Adopt deeply understands the application's inner workings (Authentication, RBAC, APIs, URLs, Entities), automatically generate actions and provides flexible deployment options to meet your end users where they are.
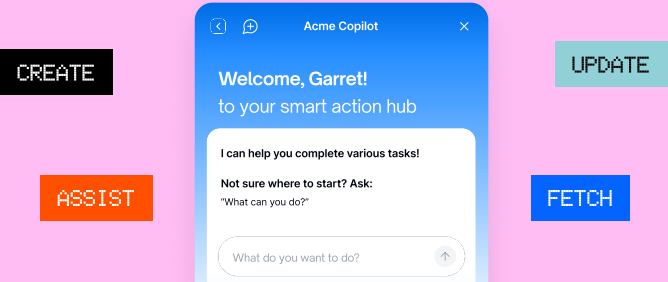

Product Highlights

Agent Builder

Design, build, and deploy AI agents with unprecedented speed and ease. Our intuitive, natural language interface empowers your team to create custom agents that meet your specific needs, without requiring extensive coding expertise.

Agent Experience

Deliver the future of user interaction today. Transform your applications into intelligent, adaptive systems that understand user intent and provide seamless, personalized experiences.

Are You Ready for the Agentic Revolution?
Ask yourself...

1	Are your users frustrated with complex workflows?
2	Is your support team overwhelmed with repetitive tasks?
3	Are you maximizing the potential of your application's features?
4	Are you positioned to lead in the age of AI, or are you falling behind?

Transforming User Experience with Adopt AI

"Adopt has been a game-changer for us. We wanted to integrate Agentic AI into our platform to enhance user experience and adoption, but lacked the internal bandwidth to build a deep, robust layer in a rapidly evolving AI space. With Adopt, we were able to agentify complex user actions, surface them through an intuitive unified interface, and lay a scalable foundation for future agents—all in just three weeks."

Anuraag Gutgutia
Cofounder and CPO, TrueFoundry

Ready to Transform Your User Experience?

Contact us today for a personalized demo and discover how Adopt AI can help you:

💬	Increase user engagement & adoption

🤲	Reduce user frustration and support costs

🚀	Unlock the full potential of your application
